

Commercial wall systems

Integrated insulation and barrier solutions

Rigid foam insulation coupled with innovative barrier sealing and flashing technologies helps your building perform more efficiently. Commercial wall systems from DuPont offer excellent long-term thermal performance, ease of use, moisture resistance and – in some situations – reusability.

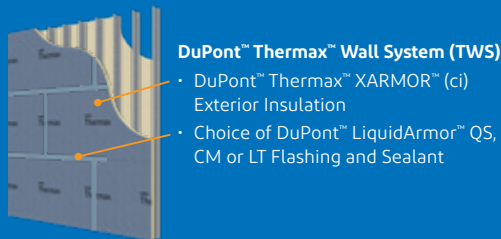

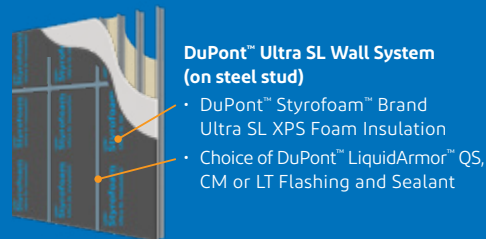

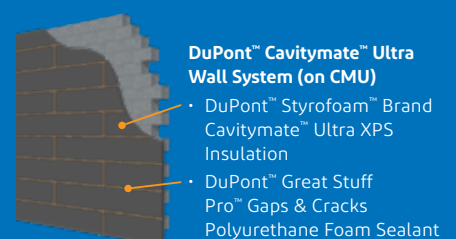

5-in-1 single-layer fire-rated (FR) structural insulated sheathing (SIS) with integrated air and water barrier

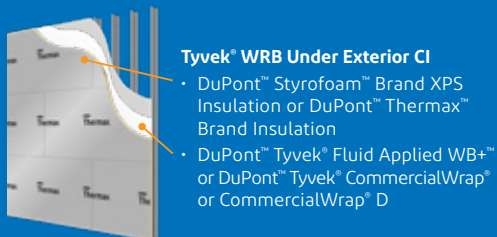

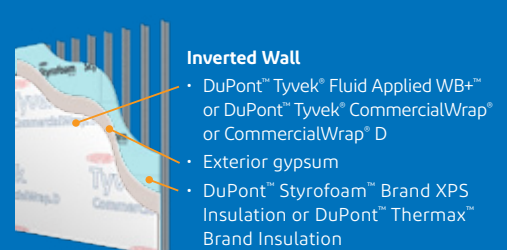

5-in-1 benefits

- 1 Fire**
 - One- and two-hour fire-rated assemblies
 - NFPA 285-compliant assemblies*
- 2 Structural**
 - High-strength structural sheathing**
 - Cladding attachment support
- 3 High-performance continuous insulation**
- 4 Proprietary air barrier**
- 5 Proprietary water-resistive barrier**

3-in-1 single-layer high-performance rigid insulation air and water barrier systems

Multilayer rigid insulation air and water barrier assemblies – DuPont™ Commercial Wall² System

*DuPont™ ArmorWall Plus FR SIS passes NFPA 285 testing without the additive protection of an exterior cladding on the front for the full duration of the test. This allows engineering judgments to be made for most NFPA 285-tested-and-approved exterior finishes when used with DuPont™ ArmorWall Plus FR SIS as part of a complete wall assembly. Refer to ArmorWall.DuPont.com for details.

**With its ability to move the stud face to the exterior face of the sheathing, DuPont™ ArmorWall Plus FR SIS has been tested to support loads equivalent to most building cladding finishes, with minimal creep while under load. Refer to ArmorWall.DuPont.com for attachment guidance.

“ We were five to six weeks behind on the construction schedule due to delays with steel. DuPont™ ArmorWall Plus got us back on track. We were framed and sheathed in six weeks, saving us three to four weeks on the project schedule. ”
